MONITORING SENTIMENT FOR DOMESTIC AND INTRA-EUROPEAN TRAVEL

10/20 | WAVE 2

Co-funded by the European Union
This report monitors sentiment and short-term intentions for domestic and intra-European travel, and it is the second out of six waves of market research, started in September 2020. Responses are collected from European citizens from 10 high-volume source markets in light of the COVID-19 crisis.

• Despite a second wave of COVID-19 and with no approved vaccine yet, Europeans’ sentiment towards domestic and intra-regional travel remains stable and quite positive with 53.6% of respondents intending to travel in the next 6 months (compared to 53.5% in wave 1).

• At the same time, sentiment is fairly similar towards domestic (38.8%) and intra-European travel (39.2%).

• However, compared to wave 1, fewer Europeans are planning a trip in the next 2 months. The survey highlights an -18% drop in respondents wishing to travel before December 2020 and slight increases in uncertainty about the exact timing and destination of their trip (+5.8% and +7.6% respectively).
WAVE 2
RESEARCH HIGHLIGHTS

• Quarantine measures remain the top concern for the largest share of travellers (14.9%) intending to take a trip in the near future. In the meantime, a growing number of respondents are now afraid of becoming ill at the destination (a +10% growth compared to wave1) indicating a fatigue in the travel sentiment for the short-term.
• Rising COVID-19 cases at the destination (12.4%), transport and accommodation safety protocols (9.9%) as well as changes in travel restrictions during a trip (9.8%) are also triggering anxiety among an increasing number of potential travellers.
• Among different age groups, the Gen Zers (aged 18-24) remain the least likely to travel in the coming 6 months.
WAVE 2
RESEARCH HIGHLIGHTS

• The vast majority of travellers will either make their next trip with their partner (36.1%) or their family (37.4%). Only 1% are planning a group trip in the coming 6 months.

• **Leisure remains the primary purpose of travel** in the short-term for 64.9% of respondents. As the Christmas season approaches, visiting **Friends and Relatives** increased by +10%, and is now the main reason among 20.9% of Europeans. Business travel remains significant for 8.7% of respondents but still well below the benchmark of 13%\(^1\).

\(^1\) UNWTO International Tourism Highlights 2019
• Despite the effect of COVID-19 on cities and urban destinations, city breaks prevail as the most favoured type of leisure trip among 20.3% of surveyed Europeans.
• Other leading preferences include holidays in nature and the outdoors (14.9%), and trips with a focus on culture and heritage (14.7%).
• Results also reveal a sharp growth (+39%), compared to wave 1, in people’s interest in skiing and snowboarding trips due to the winter season.
• Spain (7.7%), Italy (7.5%) and France (6.8%) rank as the top-3 most preferred countries for outbound travel. Germany shows an +11.6% increase climbing to 4th place just above Greece which shows an -11.2% decline (compared to wave 1), among Europeans wishing to visit another country.

• As expected, digital sources for travel inspiration and booking predominate; 66% of “early-bird” travellers¹ will rely on digital sources to plan their next trip, while 75% plan to book online. However, the role of expert travel advisors has gained weight, as 13.6% of respondents with short-term travel plans intend to book their next trip through a travel agent/designer, an increase of +7.9% compared to wave 1.

• With new COVID-19 cases on the rise, “Health and Safety” builds on its dominant position (21.4%) as a key consideration for any sought-after travel experience during the persisting pandemic. At the same time, Europeans are also very clear about how important “Peace of mind” (13.1%) and “Affordability” (12.3%) will be for their next trips.

¹ “Early-bird” travellers refers to survey respondents that are most likely to travel in the next 6 months
49.7% of early-bird travellers intend to fly by plane, while 36.2% choose their own car for the next trip.

55.4% of respondents will make their Intra-European trip by plane compared to 34.1% that prefer to travel by road. On the other hand, 46.9% of respondents who intend to travel domestically are likely to move by car (owned or rental), while 39.3% intend to fly.

In any case, air travel remains the most worrying part of a journey healthwise for 20.0% of Europeans.

Flexible cancellation policies (10.4%) is now the undisputed king for travel decision-making among all Europeans, slightly outscoring the possibility of a COVID-19 vaccine (10.0%).
The report is also complemented by insights on travellers’ online sentiment\(^1\) for major European destinations for the period of September 2020 compared to September 2019.

- The weak travel sentiment of Gen Z (aged 18-24) is also reflected in online travel behaviour; the share of tourism-related social media mentions made by Gen Zers dropped from 16% in Sep. 2019 to 9% in Sep. 2020\(^2\).

- **Tourists’ satisfaction with the offering** of European destinations fell -9.5% in Sep. 2020 compared to Sep. 2019 and -3.38% between August and September 2020. **Tourism Product Index\(^3\)** for September 2020 was 68.6 indicating that visitors to European destinations still experienced high satisfaction levels.

- At the same time, **tourist’s satisfaction with accommodation** has remained stable or slightly improved during the pandemic; +2.4% for 5*, +0.4% for 4* and -1.8% for 3* hotels in Sep. 2019 compared to Sep. 2020. **Hotel Satisfaction Index\(^3\)** during September 2020 was 59.1 for 3* hotels, 63.9 for 4* and 62.6 for 5*.

---

\(^1\) Benchmark report for major European destinations; September 2020 compared to September 2019 (Mabrian Technologies, October 2020)

\(^2\) For more info on methodology and scoring system please refer to slide 53

\(^3\) Tourist Product/Hotel Satisfaction Indexes, measure satisfaction levels of visitors to a destination with its offering (culture, gastronomy, sun and sea) & accommodation respectively
• Pandemic fatigue is a drawback amongst travellers; thus governments and destinations should make sure that they ease the pressure, primarily through removing unnecessary administrative burdens and introducing clear regulations for all. Europeans with short-term plans should be viewed as ambassadors for rebuilding for more reluctant travellers.

• The City break strengthens its position as the favourite type of trip, with people interested in city life, urban experiences and art most eager to travel in the coming 6 months. This means that while NTBs and DMOs¹ may be tempted to cut their marketing communication budgets, they should maintain their brand equity and top-of-mind position. Specifically, urban destinations can build engaging campaigns through community involvement, where creativity will carry more weight than “budget-needy”, high production values.

¹ NTBs – National Tourism Boards | DMOs – Destination Management/Marketing Organisations
• The dominant preference for travelling with one’s family/partner should encourage destinations to develop and promote tailor-made products and experiences. These could include COVID-19 safe packages for family-friendly vacations or romantic getaways for Free Independent Travellers.

• NTBs and DMOs should carefully investigate where there is untapped potential among different market segments and capitalize on that; as Gen Z (18-24) shows the weakest appetite to travel in the coming 6 months among all age groups but is the least concerned about air travel and quarantine measures, promoting the fun and adventurous aspect of outdoor activities or cities’ hidden gems during the winter season could be the key.
WAVE 2
RECOMMENDATIONS FOR BUSINESSES

• Keep on prioritising health and safety. With health issues as well as transport and accommodation safety measures a growing concern among European travellers, service providers should continue diligently developing, implementing and communicating protocols that ease consumer sentiment.

• Air travel is vital for the short-term recovery of the industry. Building consumer trust through pre-flight COVID-19 testing and introducing physical distancing during flights cannot be understated. On the other hand, airlines may need to rethink the impact of COVID-19 travel insurance policies on consumer trust. Only 3.1% of Europeans consider the availability of travel insurance as an important factor when deciding for their trip.
Flexible cancellation policies are now the primary factor in travel decision-making and essential to facilitating bookings. Businesses (airlines, accommodation providers, etc.) can gain consumers’ confidence by creating and flagging a simple, straightforward and transparent cancellation policy.

With Peer-to-Peer review websites and recommendations from friends gaining more traction in the travel inspiration phase, tourism businesses that will be consistent, faithful to their promise and provide value beyond expectations will shorten the odds on a faster recovery.

Wave 2

1. To present data and insights, the following distinct groups have been analysed:
   - Total respondents; 5,876
   - Respondents with short-term travel plans/ most likely to travel (“early-bird travellers”) in the next 6 months; 3,148
   - Respondents selecting outbound European destinations; 4,027
3. To present the timing in which respondents are most likely to take their next trip, the following time periods should be used as a reference:
   - This month; September – October 2020.
   - In 1-2 months; October – December 2020.
   - In 3-4 months; December 2020 – February 2021.
   - In 5-6 months; February - April 2021.
4. All data and insights refer to domestic and intra-European travel, unless otherwise stated.
5. The following symbols depicted in texts/ graphs show trends between the current research wave versus the previous one.
   - Increasing ⬆, decreasing ⬇, stable -----.
6. When mention of new COVID-19 is made, it refers to the data collection period.
TRAVEL INTENTIONS
The importance of a COVID-19 vaccine for resuming travel is increasing, but still its effect will not be instant

Top 5 markets most likely to resume travel when a COVID-19 treatment is found

Spain 62.4%  
Poland 57.0%  
Italy 51.5%  
Germany 43.5%  
UK 51.7%  

Q6. To what extent do you agree/ disagree with the following statement: “when a treatment/ vaccine for COVID-19 is found, I will immediately book or reschedule the trip I had planned pre-COVID 19”

Intention to re-schedule a pre COVID-19 trip immediately after a treatment/ vaccine is found

Wave 1
- Likely/Very Likely: 25.2%
- Neutral: 30.8%
- Unlikely/Very Unlikely: 44.0%

Wave 2
- Likely/Very Likely: 24.7%
- Neutral: 30.2%
- Unlikely/Very Unlikely: 45.1%

No. of respondents: 5,876
Travel sentiment remains stable and positive - over half of respondents intend to take a trip in the next 6 months

Top 5 markets which are most likely to travel in the next 6 months

- **Poland** 77.0%
- **Spain** 54.2%
- **Italy** 59.7%
- **Belgium** 53.6%
- **Germany** 57.5%

Q7. Do you plan to take an overnight trip domestically or within Europe in the next 6 months, either for personal or professional purposes?

Intention to travel in the next 6 months

- **Wave 1**
  - Likely/Very Likely: 28.1%
  - Neutral: 18.3%
  - Unlikely/Very Unlikely: 53.5%

- **Wave 2**
  - Likely/Very Likely: 27.9%
  - Neutral: 18.5%
  - Unlikely/Very Unlikely: 53.6%

No. of respondents: 5,876
All age groups continue to exhibit the same desire to travel in the next 6 months.

Members of Gen Z (18-24) continue to show lower enthusiasm for travel, with the share of tourism-related social media mentions dropping from 16% (Sep 2019) to 9% (Sep 2020)\(^1\)

\(^1\)Benchmark report for major European destinations September 2020 compared to September 2019 (Mabrian Technologies, October 2020)

Q7. Do you plan to take an overnight trip domestically or within Europe in the next 6 months, either for personal or professional purposes?

No. of respondents: 5,876
City life enthusiasts continue to exhibit the strongest desire to resume travel in the next 6 months

Q7. Do you plan to take an overnight trip domestically or within Europe in the next 6 months, either for personal or professional purposes?

No. of respondents: 3,148

Respondents most likely to travel in the next 6 months, per type of traveller

- Sun & beach lovers
- Bleisure travellers
- Business travellers
- Explorers of cultural identity & roots
- Immersive explorers
- City life enthusiasts
- Gastronomy lovers

Wave 1
- Sun & beach lovers: 13.3%
- Bleisure travellers: 4.5%
- Business travellers: 2.0%

The majority of respondents plan to travel for leisure or to visit friends and relatives.

Top 3 markets to resume leisure travel:
- France: 73.3%
- Italy: 70.9%
- Poland: 69.3%

Top 3 markets to resume business travel:
- Spain: 13.2%
- Germany: 12.3%
- Austria: 10.9%

Q8. For what reason are you most likely to travel within Europe next?

Purpose of travel for respondents most likely to travel in the next 6 months:

- For Leisure:
  - Wave 1: 66.1%
  - Wave 2: 64.9%
- For Business:
  - Wave 1: 5.4%
  - Wave 2: 8.7%
- To visit friends/relatives:
  - Wave 1: 19.1%
  - Wave 2: 20.9%
- Other:
  - Wave 1: 6.1%
  - Wave 2: 0.0%

No. of respondents: 3,148
The city break rises (+6%) to the top of the list of favourite types of leisure trips in the next 6 months.
Markets remain loyal to specific tourism products; Spaniards show the strongest interest in City Breaks, Germans and Dutch in Nature and Outdoors, while Italians and Polish favour Culture and Heritage.

City Break

Spain: 41.2%
UK: 27.5%
Switzerland: 25.3%
Netherlands: 23.0%
Austria: 21.8%

Nature & Outdoors

Germany: 18.9%
Netherlands: 18.6%
Austria: 17.0%
France: 16.6%
Belgium: 16.0%

Belgium: 16.0%
France: 16.6%
Spain: 15.0%
Italy: 28.7%
Poland: 23.6%

How to read: Percentages indicate the share of respondents from each country interested in each type of leisure trip; i.e. 41.2% of respondents from Spain are most likely to undertake a city break trip.
Markets remain loyal to specific tourism products; the British have a strong preference for Sun and Beach, French to Coast & Sea while the Swiss lead in Cruising.

How to read: Percentages indicate the share of respondents from each country interested in each type of leisure trip; i.e. 24.9% of respondents from UK are most likely to undertake a sun and beach trip.
GERMANY

Willingness to travel grows (+9%) but respondents are less certain about the exact timing and destination of their next trip.

Q7. Do you plan to take an overnight trip domestically or within Europe in the next 6 months, either for personal or professional purposes?

Q9. When are you most likely to go on your next trip either in your country or within Europe?

Q10. Where do you plan to travel in the next 6 months?

For specific dates please refer to slide 14.

No. of respondents: 750
UNITED KINGDOM

Among analysed markets, British respondents are most uncertain about when they will go on a trip next.

Willingness to travel in the next 6 months

When will Britons travel?

Where will Britons travel within the next 6 months?

Q7. Do you plan to take an overnight trip domestically or within Europe in the next 6 months, either for personal or professional purposes?

Q9. When are you most likely to go on your next trip either in your country or within Europe?

Q10. Where do you plan to travel in the next 6 months?

For specific dates please refer to slide 14.
FRANCE

With a steady rise of new COVID-19 cases in the country, respondents’ intention to travel within the next 2 months declines (-12%)

Q7. Do you plan to take an overnight trip domestically or within Europe in the next 6 months, either for personal or professional purposes?

Q9. When are you most likely to go on your next trip either in your country or within Europe?

Q10. Where do you plan to travel in the next 6 months?
NETHERLANDS

Dutch respondents are less positive (-13%) about trips in the next 6 months but they are more interested in international than domestic travel

Q7. Do you plan to take an overnight trip domestically or within Europe in the next 6 months, either for personal or professional purposes?

Q8. When are you most likely to go on your next trip either in your country or within Europe?

Q10. Where do you plan to travel in the next 6 months?

For specific dates please refer to slide 14
ITALY
The majority of respondents do not plan to go on a trip before 2021 and show a clear preference to travel within their country.

Q7. Do you plan to take an overnight trip domestically or within Europe in the next 6 months, either for personal or professional purposes?

Q8. When are you most likely to go on your next trip either in your country or within Europe?

Q10. Where do you plan to travel in the next 6 months?
BELGIUM
Travel confidence improves (+9%) and so does respondents’ interest in visiting other European destinations

Q7. Do you plan to take an overnight trip domestically or within Europe in the next 6 months, either for personal or professional purposes?

Q9. When are you most likely to go on your next trip either in your country or within Europe?

Q10. Where do you plan to travel in the next 6 months?

For specific dates please refer to slide 14

No. of respondents: 500
Respondents’ appetite for trips in the next 6 months drops significantly (-18%) as COVID-19 cases spike in the country.

Q7. Do you plan to take an overnight trip domestically or within Europe in the next 6 months, either for personal or professional purposes?

Q9. When are you most likely to go on your next trip either in your country or within Europe?

Q10. Where do you plan to travel in the next 6 months?
### SPAIN

Respondents shelve their travel plans for the rest of 2020 with less certainty about the exact timing of their next trip.

Q7. Do you plan to take an overnight trip domestically or within Europe in the next 6 months, either for personal or professional purposes?

Q9. When are you most likely to go on your next trip either in your country or within Europe?

Q10. Where do you plan to travel in the next 6 months?

For specific dates please refer to slide 14

No. of respondents: 500
The majority of surveyed Europeans intend to travel with their family (+5%) or partner (-3%) in the mid-term.

**The travel companion lifecycle:** respondents aged 18-24 are more likely to travel with friends, while those aged 35-54 prefer to travel with their family. Respondents aged 25-34 and over 55 are more likely to travel as a couple.

- For **domestic trips**, 76% of Europeans will be accompanied by their family or partner while 12% will travel solo.
- For **trips outside Europe**, 64% of respondents will travel with their family or partner compared to 20% that will travel solo.

Q16. With whom are you most likely to travel during your next trip within Europe?

No. of respondents: 3,148
Respondents demonstrate a stable preference for digital sources, with 2 out of 3 intending to use online information to plan their next trip.

The importance of personal recommendations is even greater for those planning to travel domestically.

Top 10 preferred sources of information for respondents most likely to travel in the next 6 months:

- Travel review websites: 20.8%
- A hotel website or social media: 12.1%
- Recommendations from friends: 11.7%
- Destination website or social media: 10.8%
- Travel agent/tour operator: 10.0%
- An airline website or social media: 8.1%
- An online travel video on YouTube, Facebook, etc.: 8.1%
- Newspaper/magazine articles: 6.1%
- Digital content from someone followed on Social Media: 3.7%
- A travel show on television/OnDemand/podcast: 3.6%
Q13. How will you book your next trip within Europe?

3 out of 4 respondents will book their next trip through digital platforms as online booking engines dominate among consumers.

- Online booking engine: 49.4%
- Direct booking via accommodation/airline website: 25.2%
- Travel agent/travel designer: 13.6%
- Package holiday through a Tour Operator: 7.8%
- Corporate travel office: 3.9%

19% of respondents over the age of 55 will book via a travel agent/designer.

NB: Sampling carried out through online survey thus it may contain bias towards digital usage.

No. of respondents: 3,148
Air travel still not taking-off to pre-pandemic levels while driving holds its traction among Europeans

Q14. Which of the following modes of transport would you most consider using during your next trip within Europe?

No. of respondents: 3,148

By Air

By an Owned Car

By Train

By a Rented Car
Over half of respondents prefer to stay at a hotel or resort. Meanwhile, with Christmas approaching, staying with friends and family is becoming a stronger preference.

Preferred type of accommodation for respondents most likely to travel in the next 6 months

Q15. Which of the following types of accommodation would you most consider staying at during your next trip within Europe?
With Europe witnessing a second wave of COVID-19, health and safety still head the list of key criteria for any travel-related choice

The term “Travel Qualities” refers to the nature, traits and characteristics of the travel experience sought by consumers.

- **Health & Safety**: 21.4%
- **Relaxation & Peace of mind**: 13.1%
- **Affordability**: 12.3%
- **Comfort**: 10.5%
- **Discovery**: 5.9%
- **Privacy**: 5.1%
TRAVEL CONCERNS
Despite the impact of COVID-19 more than 1 in 2 Europeans remain committed to travel and will change plans to ensure their trip still goes ahead

How has COVID-19 affected travel plans

- 15.0% (Wave 1) - 15.4% (Wave 2) Insist on travelling and will change plans
- 9.3% (Wave 1) - 8.7% (Wave 2) I made the trip with some changes from the initial planning
- 9.1% (Wave 1) - 9.4% (Wave 2) I changed my trip from international to domestic
- 14.2% (Wave 1) - 12.6% (Wave 2) I changed the destination so I can use my own vehicle to travel
- 8.8% (Wave 1) - 9.8% (Wave 2) I rescheduled it for another date
- 20.7% (Wave 1) - 21.9% (Wave 2) I cancelled my trip completely

Top 5 markets which chose a domestic trip over international because of COVID-19

- Poland: 21.8%
- Austria: 21.4%
- Switzerland: 19.4%
- Germany: 18.5%
- Italy: 15.9%

Respondents planning a ski/snowboard trip are more likely to keep their original travel plans despite the pandemic

Q2. If you had planned an overnight trip in the next 6 months within Europe, how does COVID-19 affect your plans?

No. of respondents: 5,876
“Flexible cancellation policies” now outscore “finding a vaccine for COVID-19” as the leading factor in travel decision-making among Europeans.
SIZING UP TRAVEL ANXIETIES
Health concerns are still at the forefront of travellers’ sentiment; yet quarantine measures persist as the major deterrent for travel among Europeans.

Leading concerns for travelling in Europe

- **14.3%** Quarantine measures during my trip
- **12.8%** Rising COVID-19 cases in the destinations I want to visit
- **9.9%** Transport and accommodation safety measures
- **8.7%** Changes in travel restrictions to and from my country during my trip
- **7.3%** Economic situation and personal finances
- **13.2%** Becoming ill at the destination
- **9.9%** Becoming ill in transit
- **8.3%** Booking and cancellation policies
TRAVEL CONCERNS OF “EARLY BIRD” TRAVELLERS
Becoming ill at the destination and rising COVID-19 cases are now growing anxieties for “early bird” travellers

Leading concerns for those who are most likely to travel next

- **14.9%** Quarantine measures during my trip
- **12.4%** Rising COVID-19 cases in the destinations I want to visit
- **9.8%** Changes in travel restrictions to and from my country during my trip
- **9.0%** Booking and cancellation policies
- **12.6%** Becoming ill at the destination
- **9.9%** Transport and accommodation safety measures
- **9.5%** Becoming ill in transit
- **6.8%** Economic situation and personal finances

No. of respondents: 3,148
Both transport to and within the destination remains the most stressful part of a journey in relation to personal health and safety.

**The most worrisome touch points during travel in relation to personal health & safety (Top 5)**

METHODOLOGICAL ANNEX

TRAVELLERS’ ONLINE SENTIMENT

- **Objective**: Benchmark major European tourism destinations in terms of tourist satisfaction and interests.
- **Behavioural modes**: Insights based on social media mentions
- **Destinations**: United Kingdom, France, Netherlands, Croatia, Belgium, Germany, Italy, Greece, Portugal and Spain
- **Origin markets**: Germany, United Kingdom, France, Spain, Italy, Switzerland, Belgium, Netherlands, Poland and Austria
  - Data subject to availability
  - Domestic market excluded
- The following **indicators** are analysed:
  - **TPI > The Tourist Products Index**, measures the level of satisfaction with the offer (products) of the destination in its various categories: Cultural, Gastronomic, etc. This index is obtained by analysing the distribution of positive, negative and neutral comments that are produced for each of these products on Twitter and Tripadvisor.
  - **HIS > The Hotel Satisfaction Index**, measures, as the name suggests, the level of visitor satisfaction with the entire accommodation sector of a destination for three, four and five-star hotels, based on comments on the accommodation offer that guests make on Tripadvisor, Expedia and Booking.
The indexes are calculated by using advanced Natural Language Processing, Artificial Intelligence and Machine Learning techniques to analyse millions of spontaneous tourist interactions on social media or reviews sites. It enables the identification of tourist mentions (from visitors or potential visitors) related to some specific issue (i.e. Product, Hotel, Security, Climate) and the sentiment associated with them. The machine sorts the mentions in three categories: positive, neutral and negative and calculates the index based on volumes and share of each of them.

**Index scoring system:** The calculated indices show values between 0 and 100 points. Below, the rating scale is shown to know the meaning and evolution of the indicators over time.

- **0 to 24 points:** Those indicators or indices that are within this scale, show **very low levels of satisfaction and confidence** and therefore are a priority area for reconfiguration.
- **25 to 49 points:** **Relatively low level of satisfaction and confidence.** Important potential for improvement.
- **50 to 74 points:** **Good to very good satisfaction level.** Moderate potential for improvement.
- **75 to 100 points:** **Excellent satisfaction and confidence levels.** In some cases there are margins for improvement, although in most of them they are levels to maintain and consolidate.

For a more detailed description about the specific indices please visit the following [link](#).
